Developing countries like India, other Asian and African countries are faced with similar challenges in the health sector – increasing demand due to growing population and increasing life expectancy; double burden of communicable as well as non-communicable diseases; issues of equity and access, resource constrained health system, cost of care and quality of services. Some of the most important challenges of strengthening public health systems are in governance and management. Going by India's experience, especially in the context of reforms guided by the National Health Mission (NHM) and Ayushman Bharat, which is a major step forward for universal health coverage, with their overarching institutional framework of the health sector provide significant platform to learn from their experience.

To achieve the health-related goals, developing nations need to significantly scale up coverage of priority health services. This requires resources, technological innovations and better leadership & management for effectively using these resources to achieve measurable results. One of the effective ways to overcome the challenges is to enhance cooperation among the developing countries through exchange of ideas and sharing of experience.

The GDC Fellowship Programme in Public Health Management has been designed and developed for public health professionals belonging to Asian and African countries with an aim to provide them with comprehensive orientation of Public Health Management Initiatives in the developing nation context using India's flagship health programmes as examples for understanding the challenges and the innovative approaches for successful implementation.

Objectives of the Programme

The objective of the programme is to appraise the international participants about the framework and technical features of India's flagship health programmes and its application in their respective national contexts.

Partners

Global Development Centre (GDC)

Established at RIS, the Global Development Centre (GDC) aims to institutionalize knowledge on India's development initiatives and promote their replication as part of knowledge sharing in Asia and Africa with the help of its institutional partners, including civil society organisations. It attempts to explore and articulate global development processes within a micro framework and works as a unique platform to collate and assimilate learning processes of other countries towards promotion of equity, sustainability and inclusivity based on a multidisciplinary and multi-functional approach.

For more information kindly visit: www.gdc.ris.org.in

Research and Information System for Developing Countries (RIS)

Research and Information System for Developing Countries (RIS) is a New Delhi-based autonomous policy research institute that specialises in issues related to international economic development, trade, investment and technology. RIS is envisioned as a forum for fostering effective policy dialogue and capacity-building among developing countries on global and regional economic issues. The focus of the work programme of RIS is to promote South-South Cooperation

The focus of the work programme of RIS is to promote South-South Cooperation and collaborate with developing countries in multilateral negotiations in various forums. RIS is engaged across inter-governmental processes of several regional economic cooperation initiatives. Through its intensive network of think tanks, RIS seeks to strengthen policy coherence on international economic issues and the development partnership canvas.

For more information kindly visit: www.ris.org.in

Public Health Foundation of India (PHFI)

The Public Health Foundation of India (PHFI) is a public private initiative that has collaboratively evolved through consultations with multiple constituencies including Indian and international academia, state and central governments, multi & bi-lateral agencies and civil society groups. PHFI is a response to redress the limited institutional capacity in India for strengthening training, research and policy development in the area of Public Health.

PHFI recognizes the fact that meeting the shortfall of health professionals is imperative to a sustained and holistic response to the public health concerns in the country which in turn requires health care to be addressed not only from the scientific perspective of what works, but also from the social perspective of, who needs it the most.

For more information kindly visit: www.phfi.org

Programme Pedagogy

The 14-day GDC Fellowship programme was planned to be delivered in a workshop mode coupled with field/institutional visits to deliver the filed experiences of the national health programmes. The programme utilised the official facts/figures coupled with the experience of delivering the flagship national health programmes delivered by key programme leaders and experts associated with the same. It had strong emphasis on showcasing various aspect of national health programmes, its components and challenges in the delivery in diverse geographical regions of India. Field visits and institutional visits were organised to further enhance participants understanding of the programme context and implementation.

Pre-preparatory Phase

Signing of Memorandum of Agreement (MoA)

The MoA between PHFI and RIS to implement the GDC Fellowship Programme in Public Health Management was signed on 11th November 2019. Following this, PHFI and RIS discussed and finalized the structure of the programme and participation criteria.

Preparatory Phase

Nomination of GDC Fellows

Based on the participation criteria, PHFI worked with its partners and collaborators in Asia and Africa to advocate the programme. Despite short advocacy period, we received nominations from 11 countries. Nominated participants were requested to provide relevant background and experience details. Based on the same, participation of 15 candidates from 9 countries were confirmed who are either working with health departments/government institutions or in leadership position in the domain of public health.

Clearance from Ministry of Home Affairs and Ministry of External Affairs

On confirmation of nominations, clearance for 15 participants was obtained from Ministry of Home Affairs and Ministry of External Affairs by RIS.

Participant Visa and travel arrangement

PHFI arranged economy class air tickets from participant's country capital to New Delhi in consultation with them. Participants were also provided invitation and visa letters for obtaining visa and institutional clearance.

Programme Agenda

Keeping in view the objectives of the programme, PHFI developed the draft agenda for the 14-day programme. The agenda focussed on showcasing India's flagship health programmes. It included lecture sessions, institutional and field visits. The agenda focused on the following broad areas:

- India's Healthcare System
- India's flagship health programmes challenges and learning
- Integration of traditional/alternative medicine in the health system
- Planning, monitoring and evaluation of national health programs
- Innovations in health
- Capacity building in public health
- Leadership and motivation
- Patient safety and quality in healthcare

The day wise agenda for 14 days was finalized in consultation with RIS. The final programme agenda is given in Annexure 1.

Faculty for the Programme

The faculty for the programme were selected based on their experience in implementing various flagship programmes and their excellence in delivering the sessions. A total of 32 technical sessions were planned to be delivered by eminent academicians and functionaries. Most of the faculty were from the Ministry of Health & Family Welfare, Government of India and other government institutions supporting the implementation of national health programmes. The institution wise list of faculty is given in the following table:

Table 1 - List of faculty and programme/topic covered

S. No	Faculty Name & Designation	Department/Institution	Programme/ Focus Area
1	Dr Indu Bhushan	Ayushman Bharat-PMJAY and National Health Authority,	Ayushman Bharat-PMJAY
	Chief Executive Officer	Government of India	
2	Dr Ajay Khera	Maternal and Child Health	Maternal and Child Health
	Commissioner	Division, Ministry of Health and	Programme
		Family Welfare, Govt. of India	
3	Mr N Yuvaraj, IAS	Ministry of Health & Family	National Health Mission
	Director	Welfare, Government of India	
4	Dr S K Sikdar	Immunization Division, Ministry	National Immunization
	Addl Commissioner	of Health & Family Welfare,	Programme
		Government of India	

5	Dr D C Katoch Advisor (Ayurveda)	Ministry of AYUSH, Government of India	AYUSH
6	Dr Alok Mathur Additional DDG	Directorate General of Health Services, MoHFW, Government of India	National Mental Health Programme
7	Dr Indu Grewal Chief Medical Officer	National Mental Health Programme, Directorate General of Health Services, Government of India	National Mental Health Programme
8	Dr Suhas Dhandore Deputy Director	National Centre for Disease Control, MoHFW, Government of India	Integrated diseases Surveillance Programme (IDSP)
9	Dr Himanshu Bhushan <i>Advisor</i>	National Health Systems Resource Centre, MoHFW, Government of India	Comprehensive Primary Health Care (CPHC), Ayushman Bharat
10	Ms Mona Gupta Advisor	National Health Systems Resource Centre, MoHFW, Government of India	District Health Action Plan under National Health Mission
11	Dr J N Srivastava Advisor	National Health Systems Resource Centre, MoHFW, Government of India	Patient Safety & National Quality Assurance Standards
12	Mr Rakesh Munshi Joint Director	Department of health & Family Welfare, Government of Madhya Pradesh	National Health Mission - Monitoring & Supervision
13	Dr T K Mukherjee Advisor (Health)	Kolkata Municipal Corporation, Government of West Bengal	Capacity Building for NCD programme (NPCDCS)
14	Dr Shalley Kamra State Nodal Officer	Directorate General of Health Services, Government of NCT of Delhi	Mohalla Clinic
15	Dr Shirshendu Mukherjee <i>Mission Director</i>	Biotechnology Industry Research Assistance Council (BIRAC), Department of Biotechnology, Government of India	Strategic research & Innovation capabilities
16	Dr Anita Singh Senior Director	Healthcare Sector Skill Council, Ministry of Skill Development and Entrepreneurship (MSDE), Government of India	Capacity building of healthcare professionals
17	Dr Neera Dhar <i>Professor</i>	National Institute of Health and Family Welfare, MoHFW, Government of India	Spiritual Health
18	Dr Suneela Garg <i>Professor</i>	Maulana Azad Medical College, Government of NCT of Delhi	Health Programme Planning, National Health Mission
19	Dr Arun Sharma <i>Professor</i>	University College of Medical Sciences, Government of NCT of Delhi	Monitoring & Evaluation, National Health Mission
20	Dr Khushboo Jain Assistant Professor	Morarji Desai National Institute of Yoga, Ministry of AYUSH, Govt. of India	Yoga (AYUSH)

$Venue\, and\, logistics\, arrangements$

A team of 5 PHFI personnel worked in close coordination with the RIS to finalize the venue and other logistics arrangements. The venue and lodging for the participants were arranged at India Habitat Centre.

Implementation Phase

Arrival of participants

The air tickets and accommodation for 15 participants from Bhutan, Myanmar, Nepal, Maldives, Mauritius, Sri Lanka, Kazakhstan, Ghana and Kenya were arranged by PHFI based on their confirmation. However, due to recent outbreak of Corona virus and its implications in countries across the globe, 6 participants conveyed their inability to attend the programme during the days leading to the start of the programme. The remaining 9 participants from 7 countries – Bhutan (2), Myanmar (2), Nepal, Maldives, Sri Lanka, Kazakhstan and Kenya arrived on 23rd February 2020 and were received at the airport by PHFI representatives. All 9 participants were doctors working with the government's public health department or national/teaching hospitals of respective countries. The final list of participants and their profile is given in Annexure 3.

Inaugural Programme

An inaugural programme was organised on 24th February 2020. The programme started with a special session on Universal Health Coverage: Principles and Pathways by Prof K Srinath Reddy, President, PHFI. The session provided the overall context of flagship national programmes leading to achievement of universal health coverage. The session was followed by the Inaugural Programme that was attended by dignitaries, faculty and other invitees. The programme started with lamp lighting followed by address by dignitaries on the dais that included Prof Sachin Chaturvedi, Director General, RIS, Prof K Srinath Reddy, President, PHFI, Dr Sanjay Kalra, President, Endocrine Society of India and Mr Jayanto Narayan Chaudhary, Vice President Operations, PHFI. The gathering was also addressed over the phone by Dr Indu Bhushan, CEO, Ayushman Bharat & NHA. Programme ended with vote of thanks by Dr Pushkar Kumar, Senior Public Health Specialist, Training Division, Public Health Foundation of India.

Technical Sessions

Technical sessions and their speakers were carefully selected to showcase national health programmes and flagship initiatives of the government. The programmes showcased in the sessions include Ayushman Bharat Yojna including Health and Wellness Centre under Comprehensive Primary Health Care and Prime Minister's Jan Arogya Yojna, National Health Mission, Maternal & Child Health Programme, Universal Immunisation Programme, Integration of AYUSH, Integrated Diseases Surveillance Programme (IDSP) and National Mental Health Programme. In addition, various other sessions such as planning, monitoring, innovations, quality, patient safety etc also focussed on strengthening different components of the national programmes and health system strengthening initiatives.

Technical sessions on all days started at 9:30 in the morning and finished at 5:30 in the evening. Each day had 4 sessions of 90 minutes each. There were tea breaks after the 1st and 3rd session and a lunch break after the 2nd session. The sessions were a mix of lecture using slides and question & answer. The day wise proceedings of technical sessions are given in Annexure 4.

Field Visits

Field visits were planned to showcase India's health care system and orient the participants on actual implementation of the flagship health programmes at primary and community levels. Accordingly, the visits to Primary Health Centre (PHC) and Subcentre (rural) and Mohalla Clinic (urban) were undertaken during the GDC Fellowship programme.

During the visit to Jahangirpur PHC cum Health & Wellness Centre in Jhajjar district of Haryana on 26th February 2020, participants were briefed by district health officials and faculty from nearby medical college regarding the Ayushman Bharat that emphasised on prevention of non-communicable diseases along with the existing primary healthcare services. The fellows were joined by Dr Manoj Saini, Deputy Chief Medical Officer of Jhajjar and Dr R B Jain, Senior Professor, Community Medicine, PGIMS Rohtak. On arrival at the PHC, participants were briefed about the area, population and primary healthcare services. Participants took a round of the PHC to see the facilities and had extensive interaction with the Medical Officer, nursing personnel and other functionaries. They also interacted with Homeopathy doctor and Yoga instructor. Participants witnessed Yoga session at the PHC. Integration of AYUSH at primary healthcare level, provision of free medicines & diagnostic tests and disease surveillance were some of the areas in which participants showed keen interest.

In order to demonstrate the linkage of primary health centre with the community level health interventions, participants were taken to the Subcentre at Kherijatt village under the Jahangirpur PHC. They were briefed about community level implementation of maternal and child health programme, immunisation programme and screening of population for early detection of non-communicable diseases. Participants had rich interaction with the Auxiliary Nurse Midwife (ANM), Multipurpose Health Worker (MPHW) and Accredited Social Health Activist (ASHA). Participants had several queries on how ASHAs managed community mobilisation, screening for NCDs, financial incentives to ASHA, promotion of institutional deliveries and referral linkages.

A visit to Mohalla Clinic near Kashmiri Gate in Delhi was organised to demonstrate innovative approach to improve accessibility of primary healthcare services in urban areas. The project was conceptualized as quality primary health care services affordable and accessible within the communities in Delhi at their doorstep. Participants were shown a fully functional clinic in a pre-engineered insulated, air-conditioned box type structure of 60 m², that can be easily relocated so that the services are available within 1 km/10-minute distance. During the visit, participants interacted with the doctor and other officials regarding the functioning of the clinic. Participants had several queries regarding its linkages with the health system which was explained by the coordinator of the clinic. Preceding the visit, Dr Shalley Kamra, State Nodal Officer the Mohalla Clinic took a session to explain the concept behind the project and implementation challenges.

Field visit to Jahangirpur PHC cum Health & Wellness Centre, Jahangirpur, Jhajjar

Interaction with ANM and ASHAs at Kherijatt Subcentre

Briefing by Medical Officer at Mohalla Clinic in Delhi

Institutional Visits

Institutional visits were planned to showcase the research and technical support provided by various specialised institutions for policy development, effective planning, implementation, monitoring and evaluation of flagship health programmes. The visit included National Centre for Disease Control (NCDC), National Health Authority (NHA) and National Institute of Cancer Prevention and Research (NICPR). A brief profile of the institutions visited is given in Annexure 5.

On 28th February participants visited the National Centre for Disease Control (NCDC). NCDC plays leading role in undertaking investigations of disease outbreaks all over the country employing epidemiological and diagnostic tools. It also provides referral diagnostic services to individuals, community, medical colleges, research institutions and state health directorates. It also makes available scientific research material, teaching aids, storage and supply of vaccines and quality control of biologicals. Purpose of the visit was to orient the participants on how the NCDC is providing technical support to India's National Health Programmes through research, surveillance, diagnostics, prevention and treatment protocols. During the visit participants were briefed about the activities of NCDC by officials of respective departments.

National Health Authority is the apex institution responsible for implementing India's flagship public health insurance/assurance scheme 'Ayushman Bharat Pradhan Mantri Jan Arogya Yojana' (PM-JAY). PM-JAY is the world's largest fully Government funded health insurance scheme for providing coverage to nearly 10.74 crore poor families by providing financial protection for selected secondary and tertiary care hospitalisations. The objectives of the PM-JAY are to reduce catastrophic out-of-pocket health expenditure, improve access to quality health care and meet the unmet need of the population for hospitalisation care. During the visit, participants were briefed about PM-JAY, its relevance, design, implementation, eligibility and eco-system. They were explained regarding challenges and strengthening of anti-fraud unit and analytics of PM-JAY. The participants were also given a presentation as to how the whole system of PM-JAY was made paperless and how do the hospital get empanelled into the system. There were questions about how the target population for the scheme is identified which were answered by the officials.

GDC Fellows visited National Institute of Cancer Prevention and Research (NICPR) on 5th March 2020. The purpose of the visit was to understand the research and technical support being provided to the National Programme for Cancer prevention. NICPR is the apex institution under the aegis of Indian council of Medical Research which undertakes research for the development of preventive and therapeutic approaches for prevention/diagnosis of cancer in community settings. During the visit, participants visited departments of preventive oncology, cytopathology, molecular biology, epidemiology & biostatistics, bioinformatics, clinical oncology and the national tobacco testing lab.

Institutional visit to National Centre for Disease Control (NCDC)

Interaction with officials at National Health Authority (NHA)

Institutional visit to National Institute of Cancer Prevention and Research (NICPR)

Presentations by participants

In tune with the objective of cross learning, each participant gave presentation on their country's health system, challenges faced and learnings from India's flagship programmes that could be useful to their country context. In general, participants agreed that their health systems have a lot of similarities with India, yet their challenges are more contextual. For example, large inaccessible mountainous area with sparse population in Bhutan, scattered island with very small population in Maldives and resource constraints in Kenya were some of the challenges faced by the participant's country.

Following are some of the key learnings from government's flagship programmes that has prospects of their possible replication in participant's countries:

- Yoga as wellness component for NCD prevention under Ayushman Bharat
- Community level screening for NCDs by ASHA
- Integration of AYUSH at primary care level
- · Use of mHealth for population screening
- Capacity building programmes for primary care physicians in management of chronic conditions

Valedictory

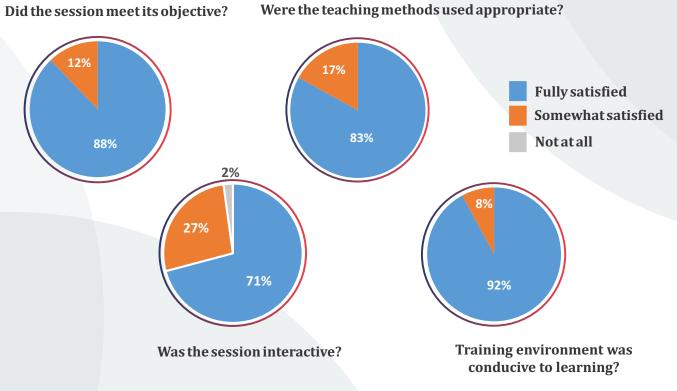

The valedictory session for GDC Fellowship programme in Public Health Management was organised by RIS on 6th March 2020 jointly with GDC Fellowship Programme on Women's Economic Empowerment and ITEC Programme on International Economic Issues and Development Policy (IEIDP). Shri Akhilesh Mishra, Additional Secretary, Development Partnership Administration, Ministry of External Affairs, Govt. of India was the chief guest at the function. GDC Fellows were given a certificate of participation and a memento by the dignitaries. A sample participation certificate is given in Annexure 6.

Participant Feedback

A concurrent session feedback and evaluation was done on all days which intended to summate the feedback, satisfaction and experiences of the participants during the course. The feedback obtained will further enable to suitably modify the course curriculum content and delivery of future cycles of this course thereby strengthening the quality, going forward. On the last day of the programme an experience sharing & feedback session was organised where participants provided their feedback on the programme which also included accommodation, travel arrangements, food, speakers, lectures, programme format and venue. Participant also provided testimonials which are given in Annexure 7.

Technical Sessions: Participants were satisfied with the speakers and appreciated their knowledge and experience of flagship health programmes. Regarding duration of each session, participants felt that the sessions could be shortened to 1-hour and include more interactive tools such as group discussions. Participants also suggested to have technical sessions in the morning and activities in the afternoon. The afternoon session duration could be shortened to 4.30 pm. There were suggestions to include sessions on emergency management system and research in health. Participant feedback on technical sessions are summarised below:

Accommodation & logistics arrangements: Participants were happy with the travel arrangements from their country as well as local travel. Participants liked the location and ambience of the venue. They also appreciated that the venue and accommodation were in the same place. The accommodation was clean and comfortable. The participants were not too keen on Indian food daily and change of cuisine was suggested.

Programme Format & Duration: The programme was appreciated by all participants though they would have preferred a smaller duration of 8-10 days. The field/institutional visits were appreciated for being in line with the course objectives. The participants felt more field visits could be added.

Future collaborations: Participants expressed their willingness to support in connecting with authorities of their countries for adoption of learnings from the programme. Some of the responses are as follows: "... I would be happy to collaborate with PHFI, m-Health & see how we can improve Healthcare..." Dr Evans, Kenya. "... I will link you with the community health team because they are the main body involved in community health so that further programmes could be established. We lack an institution like PHFI in Sri Lanka, a body that looks after capacity building and these kinds of collaborative efforts..." Dr Sonali, Sri Lanka. "... What I hope to take back is that PHFI has launched many courses on CVD, Diabetes and NCDs in general. Although I may not be in a position to actually implement it at the ministry or country level. I will take this further and speak to the health authorities in Bhutan & try to see if we can implement these projects, especially in NCDs..." Dr Kinley Tshering, Bhutan.

Way Forward

All GDC Fellows have strong linkage with their government as they are working with the Health Departments of the respective Governments or their Government National Hospitals /Teaching Hospitals. During the programme, participants showed their keenness to learn about the flagship programme especially those that are relevant to their country context. Participants felt that some of the learnings could be adopted by their government. As introduction of new programmeme or changes in the existing programme require concurrence of decision makers at the highest level of the government and it requires advocacy at the highest level, in this regard, most participants expressed their willingness to act as a bridge to connect RIS-PHFI with their officials and suggested brainstorming sessions of 2-3 days in their respective countries with their policy makers and technical leaders for further advocacy and collaboration.

Annexures

Annexure 1: Programme Agenda

GDC Fellowship Programme in Public Health Management

23rd February – 7th March 2020

Venue: India Habitat Centre, Lodhi Road, New Delhi

Agenda

Time	Session	Speaker
Day 23 rd February (Sunday)

Having seen many infectious diseases and nutritional related disorders of children he has studied Pediatrics, followed by tropical pediatrics. He has also contributed to various national health programs in the ministry of health as technical advisor while formulating national health policies. His special interest include infections and childhood disabilities and would like to contribute more through public health interventions. His hobbies include playing archery and basketball and reading spiritual books.

Dr Kuenley Pedon (Bhutan)

Dr Pedon is working as a Pediatrician in Jigme Dorji Wangchuk National Referral Hospital. She is also the member of National Committee of Immunization Practices. She is the main focal person of Adverse Events Following Immunization Investigation and a member of AEFI committee, Bhutan. Her hobbies include music, dance, yoga and gardening.

Dr Pau Sian Lian (Myanmar)

Dr Lian is currently employed in Ministry of Health & Sports as "Township Medical Officer" at Kanpetlet Township since 5th June, 2015 till date. The Past experience of Dr Lian includes "Station Medical Officer" at Rih village under Falam Township during the period between 8th August, 2013 and 4th June, 2015. His primary job assignation was "Assistant Surgeon" in Hakha Township during the period between 16th June, 2009 and 7th August, 2013. All these areas are remote areas in which community have challenges and constraints to access health services smoothly. His professional interests are that as public health care professional, 6 key pillars (based upon WHO HSS Framework) are performing at township level. So, as Township Medical Officer he had to manage daily on job activities of public health sectors based upon that 6 key pillars by balancing on planning and operating smoothly. In case of advance level health plan management,

public health professional is mandatory to seek technical guidance and knowledge through channels via workshop & on job training.

Dr Sonali Shindi Chapa Gunatilake (Sri Lanka)

Dr. Gunatilake, is a junior Consultant in Diabetes and Endocrinology, currently working at National Hospital, Kandy, Sri Lanka. She has completed her undergraduate and postgraduate qualifications obtaining merit positions - MBBS(SL), MD(Colombo), MRCP(UK), MRCP(Diabetes and Endocrinology). She was trained in endocrinology at Oxford Centre for Diabetes, Endocrinology and Metabolism, UK in 2018 and at Cambridge University Hospitals NHS Foundation Trust, UK in 2019 as a part of postgraduate training prior to return to Sri Lanka to serve as a Consultant in Endocrinologist in one of the leading centers in diabetes and endocrinology in Sri Lanka. Her role as a Consultant Endocrinologist extends to treatment as well as implementing strategies in community for improving education and prevention of diabetes & non communicable diseases (NCD). Her professional interests are in Pituitary Disorders, especially related to steroids and HPA axis, parathyroid disorders and type 2 diabetes, especially on the role of prevention and early interventions to treat diabetes. She has conducted several research projects and have publications both nationally and internationally. Further, she has actively participated in community projects, especially the WDF funded island wide Sri Lanka diabetes and cardiovascular initiative (NCD prevention and training program) as a coordinator. This project ran 3 years in Sri Lanka, aiming on improving both medical professional and public awareness as well as implementing NCD preventive programs in collaboration with government and NGOs.

Dr Vijay Kumar Khanal (Nepal)

Dr Khanal has been working as an Associate Professor from 2016 till present. He is also the member of HIV core committee. He has done research on a) Study of epidemiological factors, clinical profile and opportunistic infections in HIV/AIDS patients from Eastern Nepal. b) Knowledge, attitude and practice regarding environmental tobacco smoke among pregnant women of sunsari: A cross-sectional study. c) Ongoing research Stigma and Depression among people living with HIV/AIDS in Eastern Nepal: A community based cross-sectional study.

Annexure – 4: Day Wise Proceedings

Sessions on Public Health and AYUSH on Day-1

25th February 2020 (Tuesday)

The sessions on day-2 focused on flagship health programmes that included National Health Mission - Context and the journey so far; Comprehensive primary healthcare and reducing out-of-pocket expenditure; National Immunization Programme and Integrated Disease Surveillance Programme. Sessions were interactive and participants shared their country experiences. First two days of sessions provided the background of the Indian health system and its flagship programme.

Sessions on flagship health programmes - National Health Mission and Ayushman Bharat

26th February 2020 (Wednesday)

On day-3 GDC fellows were taken for a field visit to Jahangirpur PHC cum Health & Wellness Centre and Kherijatt Subcentre in Jhajjar district of Haryana. The fellows were joined by Dr Manoj Saini, Deputy Chief Medical Officer of Jhajjar and Dr R B Jain, Senior Professor, PGIMS Rohtak. On arrival at the PHC, participants were briefed about the area, population and health services. Participants took a round of the PHC to see the facilities and had extensive interaction with the Medical Officer, nursing personnel and other functionaries. They also interacted with Homeopathy doctor and Yoga instructor. Participants also visited a nearby Subcentre in Kherijatt village and had great interaction with the ANM, MPHW-Male and ASHAs. The visit served as an orientation on the actual implementation of flagship programmes in the field.

Field visit to PHC and Subcentre in Jhajjar, Haryana

27th February 2020 (Thursday)

Day 4 started with a session on Spiritual Health by Dr Neera Dhar, Senior Professor, NIHFW. Other sessions of the day included Health Programme Planning, mHealth for NCD Management and an overview of Mohalla Clinic in Delhi.

Sessions on Spiritual Health and Programme Planning

28th February 2020 (Friday)

On day-5, GDC Fellows visited Mohalla Clinic near Kashmiri Gate in Delhi. Participants interacted with the doctor and other officials regarding the functioning of the clinic. Participants had several queries regarding its linkages with the health system which was explained by the coordinator of the clinic.

In the afternoon participants visited National Centre for Disease Control (NCDC) at Shamnath Marg, Delhi. Participants were briefed about the activities of NCDC by officials of respective departments. The participants were given a brief overview on the integrated disease surveillance programme by Dr Jyoti, the deputy director. The microbiology department gave an overview of the various surveillance activities including antimicrobial resistance, training and diagnostic services. The zoonosis division talked about their activities on outbreak investigation and support to the national health programme by providing technical & lab support. They also visited the entomology museum at the centre.

Visit to Mohalla Clinic and National Centre for Disease Control (NCDC)

29thFebruary 2020 (Saturday)

The 1st session on Day-6 was taken by Dr Anita Singh from Healthcare Sector Skill Council. The session titled "Skill India - Preparing Healthcare professional for the World" focused on the mandate of the HSSC and the resources and systems developed by it. The earlier planned session on Capacity building case study was covered on day-2. Instead, we had a case study on technology integrating medical devices and IT for frontline workers called Swasthya Sahayak.

Sessions on skill development and use of technology in health

This was followed by 7 country presentation by the delegates. The presentation included an overview of country health systems and indicators and their learnings so far that could be relevant to their country context.

Presentation by participants

1stMarch 2020 (Sunday)

The GDC Fellows were given a one-day rest. They utilised this time to visit Tajmahal at Agra. PHFI helped in organising the trip and one of our personnel accompanied the participants.

2nd March 2020 (Monday)

The day focussed on innovations in health. The 1st session was taken by Dr Shirshendu Mukherjee, Mission Director BIRAC. Dr Mukherjee described the eco-system and funding support for innovations in India and the scope for other South Asian countries to collaborate. Dr V K Singh further elaborated on various initiatives with regard to innovations in India. and The session on "Cybersecurity in Health" by Mr. Sachin Gaur was very well received and there were several queries from participants regarding security. Dr Shuchin Bajaj presented a model for high qulity and low cost service by private sector and its linkages with Ayushman Bharat for achieving health goals".

Sessions on innovations in health sector

3rdMarch 2020 (Tuesday)

This was followed by two sessions taken by Mr. Rakesh Munshi. The first session of Mr Munshi was on "NHM goals and tools of monitoring and supervision". His second session was "Positive attitude leading to Success Mantra". The concluding session of the day was taken by Ms. Mona Gupta on "Developing District Health Action Plan" under the National Health Mission.

Sessions on planning, monitoring & evaluation under National Health Mission

4th March 2020 (Wednesday)

The first half of the day focused on Quality in Healthcare and Patient Safety by Dr Girdhar Gyani and Dr J N Srivastava respectively. Both speakers have vast experience of leading policies and programmes for improving quality in public health in India. Dr Indu Arneja took the very informative and interactive sessions on Creating Cooperative Synergies and Transforming Healthcare Culture. Dr Arneja's session were completely activity based and kept the GDC Fellows involved till the last.

Activities during session on Creating Cooperative Synergies

5th March 2020 (Thursday)

On day 11, there was a field visit to the National Health Authority and National Institute of Cancer Prevention and Research. At NHA, the participants were given a brief introduction about the insurance scheme (PM-JAY) under Ayushman Bharat. They were given a presentation on the relevance, design, implementation, eligibility, eco-system, anti-fraud unit and analytics of PM-JAY. The participants were also given a presentation as to how the whole system of PM-JAY is being paperless and how do the hospital get empanelled into the system. There were questions asked on how the target population for the scheme is identified which were answered by the respected heads.

The other visit was to National Institute of Cancer Prevention and Research in Noida, New Delhi. A small introduction was given and all the participants gave their introductions. The departments of preventive oncology, cytopathology, molecular biology, epidemiology & biostatistics, bioinformatics, clinical oncology and the national tobacco testing lab were visited. This was followed by a tour of the lab facilities of molecular oncology and bioinformatics, OPD's and the smokeless tobacco lab.

Institutional visit to NHA and NICPR

6thMarch 2020 (Friday)

The session on this day were taken by Dr Khushboo Jain followed by Dr Ambalam M Chandrasekaran. Both the sessions were focused on Yoga and NCDs. This was followed by a session on Mental Health by Dr Alok Mathur and Dr Indu Grewal. The post lunch session was taken by Dr Sanjay Kalra on Diabetes burden and strategies for prevention and control.

The sessions were followed by a short valedictory session organized by RIS where the GDC Fellows were given a certificate of participation and a memento by the dignitaries.

7th March 2020 (Saturday)

The first session was taken by Prof D Prabhakaran on NCD Management in India followed by the Impact of capacity building on Health System strengthening by Dr T K Mukherjee. The sessions were followed by short discussion and feedback from the GDC Fellows.

Concluding sessions

Implementation team

Annexure 5: Institutions Visited

National Centre for Disease Control, Delhi

The National Institute of Communicable Diseases (NICD) had its origin as Central Malaria Bureau, established at Kasauli (Himachal Pradesh) in 1909 and following expansion was renamed in 1927 as the Malaria Survey of India. The organization was shifted to Delhi in 1938 and called as the Malaria Institute of India (MII). In view of the drastic reduction achieved in the incidence of malaria under National Malaria Eradication Programme (NMEP), Government of India decided to reorganize and expand the activities of the institute to cover other communicable diseases. Thus, on July 30, 1963 the erstwhile MII was renamed as NICD to shoulder these additional responsibilities. The institute was established to function as a national centre of excellence for control of communicable diseases.

The function of the institute also included various areas of training and research using multi-disciplinary integrated approach. The institute was, in addition, expected to provide expertise to the States and Union Territories (UTs) on rapid health assessment and laboratory based diagnostic services. Surveillance of communicable diseases and outbreak investigation also formed an indispensable part of its activities. The NICD campus at Delhi covers an approximate areas of 15.35 acres which includes the former official residence of Commander in Chief of the Indian Army and now houses the administrative block, library, divisions of epidemiology and parasitic diseases. The Institute is one of its unique kind in the city of Delhi having so much of green area with about 80% as open area.

The headquarters of the Directorate of National Anti-Malaria Programme (NAMP), now named as National Vector Borne Disease Control Programme (NVBDCP) is also located in the NCDC campus. The facilities available in the campus include research laboratories, a large lecture hall, well equipped conference and seminar rooms, animal house, fish hatcheries and two hostels with a total capacity to accommodate about 125 trainees and a well maintained canteen. The campus has the facilities of play grounds for volleyball, badminton etc. as well as for indoor facilities like carom, gymnasium etc. NCDC has its headquarters in Delhi and has 8 out-station branches located at Alwar (Rajasthan), Bengaluru (Karnataka), Kozikode (Kerala), Coonoor (Tamil Nadu), Jagdalpur (Chattisgarh), Patna (Bihar), Rajahmundry (Andhra Pradesh) and Varanasi (Uttar Pradesh).

There are several technical Divisions at the headquarters of the institute i.e. Centre for Epidemiology and Parasitic Diseases (Dept. of Epidemiology, Dept. Parasitic Disease) Division of Microbiology, Division of Zoonosis, Centre for HIV/AIDS and related diseases, Centre for Medical Entomology and Vector Management, Division of Malariology and Coordination, Division of Biochemistry and Biotechnology.

National Health Authority, New Delhi

National Health Authority is the apex body responsible for implementing India's flagship public health insurance/assurance scheme 'Ayushman Bharat Pradhan Mantri Jan Arogya Yojana'. National Health Authority is the successor of National Health Agency, which was functioning as a registered society since 23rd May, 2018. Pursuant to Cabinet decision for full functional autonomy, National Health Agency was reconstituted as the National Health Authority on 2nd January 2019. NHA has been set-up to implement the PM-JAY at the national level.

An attached office of the Ministry of Health and Family Welfare with full functional autonomy, NHA is governed by a Governing Board chaired by the Union Minister for Health and Family Welfare. Chief Executive Officer (CEO), an officer in the rank of Secretary to the Government of India manages its affairs. The CEO is the Ex-Office Member Secretary to the Governing Board. To implement the scheme in the State, State Health Agencies (SHAs) in the form of a society/trust have been set up by the States. SHAs have full operational autonomy over implementation of the scheme in the State including extending the coverage to non SECC beneficiaries.

National Institute of Cancer Prevention and Research (NICPR), Noida

The primary mandate of National Institute of Cancer Prevention (NICPR) is cancer prevention. In the effort to prevent and/ or reduce the burden of cancer in India, NICPR has been building the capacity of healthcare providers in the area of cervical, breast and oral cancer screening. These efforts had to be accelerated in view of the current population based cancer screening mandate of Ministry of health and Family Welfare that was announced in August 2016.

In addition, NICPR has trained medical doctors from the state of Tripura and Cancer Research Institute in Dehradun, AYUSH doctors from All India Institute of Ayurveda (AIIA), Delhi in the past.

Mohalla Clinic, Delhi

Govt. of NCT of Delhi has been providing accessible and quality health care services through primary, secondary and tertiary facilities out of which the primary care is delivered through dispensaries, secondary health care delivered through multi-speciality hospitals and tertiary health care services through superspeciality hospitals. These health facilities cater to the needs of not only population of Delhi but also migratory and floating population from neighbourhood states which constituted considerable patient load. Besides, there are many un-served and under-served areas particularly in JJ Clusters, slums, un-authorized colonies, densely populated areas, rural areas etc. where poor and vulnerable population has no/limited access to the primary health care services within their reach. In order to fill the gaps in services, there has been a paradigm shift in reorganizing of health care services under Govt. of NCT of Delhi vide which a four tier health care delivery system has been created which is- Aam Aadmi Mohalla Clinic- for primary health care.

The Aam Aadmi Mohalla Clinic has been conceptualized as a mechanism to provide quality primary health care services accessible within the communities in Delhi at their doorstep. The setting up of AAMCs has been envisaged in the form of Pre-Engineered Insulated Box Type Re-located Structures which are to be manufactured and installed through PWD. The clinics shall provide following services:

- Basic medical care based on standard treatment protocols which include curative care for common illnesses like fever, diarrhoea, skin problems, respiratory problems etc., first aid for injuries and burns, dressing and management of minor wounds and referral services.
- All lab investigations are to be carried out by the empanelled laboratory for the clinic.
- All drugs as per the essential drug list shall be provided free of cost to the patients.
- Preventive services such as antenatal and postnatal care of pregnant women, assessment of nutritional status and counselling and preventive and promotive component of National/State Health Programmes.
- · Health information, education and awareness.

Annexure 6: Certificate

Participant Certificate

Faculty Certificate

Annexure 7: Participant Testimonials

Dr Kinley Tshering, Bhutan

I am very fortunate to attend such a holistic & comprehensive course which has specifically been designed for developing countries

Dr Kuenley Pedon, Bhutan

I am privileged to listen to the experts & high level people in the respective fields. I would take back the communication aspect with me

Dr Khin Mg Than, Myanmar

Very Complete, I like the programme

Dr Pau Sian Lian, Myanmar

The message that you want to give through the classes is perfect, overall it is a success

Dr Vijay Kumar Khanal, Nepal

Very innovative approach

Dr Faisham Mohammad, Maldives

I didn't learn just about India but also about the healthcare system in 8 other countries. It was a wonderful experience _ _

Dr Sonali Gunatilake, Sri Lanka

Good foundation for long term collaborations in these sectors

"

Dr Akylbek Saktapov, Kazakhstan

Very good implementation, great experience; before this I did not realize how complicated the healthcare system in India is. I had this great opportunity to see the challenges and development faced by healthcare system in India

Dr Evans Mwangi Manuthu, Kenya

This workshop has been an eye opening exercise that I have had; Keep it up
